Naval Surface Warfare Center
Dahlgren, Va 22448

Dear Mr. Wray:

Defoliation has been detected at NAVSWC White Oak through the interpretation of the NASA high altitude infrared panoramic photography. The detected defoliation has occured on 3 isolated trees.

The accompaning map shows the trees that are defoliated (red dots). These trees are west of the woods (yellow area) that encompass the picnic area and between the isolated undefoliated trees (yellow dot) in the field.

This suspected defoliation should be ground checked to verify the interpretations of the photographs. Please phone Noel or me at (304) 291-4133 with the ground checked results.

Sincerely,

Rodney L. Whiteman
